As statewide emergence from the recession has been slow and many municipalities continue to struggle with slashed budgets, the need for collaborative economic development efforts and pooled resources is a necessity. Join us and more than 21 communities via live stream throughout California for ideas and sharing on the topic of Building Momentum with Lean Resources.

This conference is part of a statewide effort to highlight regionalized best practices in economic development as well as hear out-of the-box ideas that have been successful for economic recovery across the nation.
